

REGD.POST WITH ACK.DUE

Order No. SEIAA/TS/OL/SGRD-04/2017- 306

Dt:17.04.2017.

Sub: SEIAA, TS - M/s. Virchow Drugs Limited, Sy. No. 639 (Part), IDA Bonthapally (V), Jinnaram (M), Medak District – Amendment to Environmental Clearance – Issued - Reg.

Ref: 1. Order No. SEIAA/TS/OL/MDK-21/2016-2308, dt. 28.11.2016.
2. Your representation along with application submitted online on 09.02.2017 (proposal no. SIA/TG/IND2/18487/2016) received on 28.02.2017.

- I. Earlier, the SEIAA, Telangana had issued Environmental Clearance for the proposed expansion of Synthetic Organic Chemicals manufacturing unit in the name of **M/s. Virchow Drugs Limited, Sy. No. 639 (Part), IDA Bonthapally (V), Jinnaram (M), Medak District** vide reference 1st cited, mentioning Stripper, MEE and ATFD as treatment system for high TDS effluents.
- II. The proponent vide reference 2nd cited informed that their neutralized effluents solid concentration is about 18 to 20% which matches that of the output of MEE. If they feed their effluents with above concentration, the effluents become more saturated and gets chocked in the MEE. Hence, MEE is not used for the evaporation. Instead, they use Preheater followed by ATFD for evaporation of their effluents. Vapor is condensed and the condensate is reused. Keeping in view the above facts, it was informed that they need not install MEE for effluent evaporation. Hence, it was requested to issue amendment to EC with suitable evaporation system followed by ATFD for evaporation of their HTDS effluents as per proposed scheme”
- III. The request of the proponent was examined by the State Level Expert Appraisal Committee (SEAC) in its meeting held on 17.03.2017. Based on the information furnished; presentation made by the proponent and the consultant M/s. Team Labs & Consultants, Hyderabad; the Committee considered the request of the proponent and recommended to issue amendment to the EC order. The State Level Environment Impact Assessment Authority (SEIAA), in its meeting held on 06.04.2017 examined the request of the proponent and the recommendations of SEAC, and decided to issue amendment to the Environmental Clearance. Hence, the following amendments are made to the EC order issued vide reference 1st cited:
- (a) The term “MEE” mentioned in condition no. iii under i. Air Pollution in A. Specific conditions shall be read as “*Single / Multiple Effect Evaporator system*”.
- (b) The condition no. iii. mentioned under b) Water Pollution in A. Specific conditions shall be read as:

*“The high TDS and low TDS effluents generated from the process are to be separated and treated separately. The high TDS effluents shall be disposed into stripper followed by Single / Multiple Effect Evaporator and ATFD. The condensate shall be reused in cooling towers after necessary treatment. The LTDS effluents shall be treated in an ETP followed by RO system. The permeate is to be re-used in the plant and rejects are to be sent to Single / Multiple Effect Evaporator system. The treated effluents shall be recycled completely. The project proponent shall achieve **Zero Liquid Discharge** and in no case the effluent shall be discharged outside the factory premises. The volatile organics shall be sent to recyclers authorized by TSPCB”.*

IV. All other information mentioned and conditions stipulated in the EC order issued vide reference 1st cited remain the same.
